T.N.: [a] EMA. It is difficult to be certain what type of cover-name this is. It seems unlikely that this is an error or variant for "EMA". A possible suggestion is that it is connected with the name of the letter "E" ("EM" may perhaps be comparable) and derived from the first two letters of the surname KEMLYGA.

[b] Or "has not been".

To SEMEN.

On account of the protracted illness of EMA, a probationer who was scheduled for being put in liaison with PATRILARCH, AKIM [1] personally effected liaison with the latter on the 26th December. PATRILARCH will be used for throwing light on [OSVESACHEV] the crews of American ships carrying Soviet cargoes. We will organize this through his sub-sources, we will also use [him] [a] for processing [GFORALENIE] the Russian-American [D. Seamen's] Club.
